

IN THE CLAIMS:

Please amend the claims as follows:

1. Canceled.
2. Canceled
3. Canceled
4. (Amended) An inflatable water sports board as in claim 1, wherein comprising:

An upper panel;

a lower panel substantially facing said upper panel, wherein said upper panel and said lower panel have a front portion and a rear portion, wherein said upper panel and said lower panel are substantially evenly curved from said front portion to said rear portion;

a sidewall, wherein said upper panel, said lower panel and said sidewall enclose an air chamber;

a plurality of thread supports between said upper panel and said lower panel throughout said air chamber;

said upper panel is flexible and has an upper panel perimeter;

said lower panel is flexible, has a lower panel perimeter, and is adjacent said upper panel;

said sidewall has an upper lengthwise perimeter and a lower lengthwise

perimeter, said upper lengthwise perimeter overlapping and adherent to said upper panel perimeter, said lower lengthwise perimeter overlapping and adherent to said lower panel perimeter; and

each of said plurality of thread supports intersects an upper point of said upper panel and an adjacent lower point of said lower panel, wherein each of said plurality of thread supports has a length between said upper point and said lower point, wherein each said upper point is separated from each said lower point by a plurality of thread supports, wherein said upper panel and said lower panel are substantially rigidified by air pressure in said chamber being greater than air pressure outside said chamber.
